International Drilling Contractor

The team that delivers

- Throughout more than 20 years in the offshore industry, Frigstad Offshore has provided its clients with first class rig and project management services.

Extensive knowledge and hands-on experience as an international drilling contractor, operating of all types of Mobile Offshore Drilling Units, make Frigstad Offshore the company of choice for rig owners seeking an industrial partner to extract the very best from their assets.

Top: Ultra deepwater semi-submersible "Scarabeo 9" under construction. Managed by Frigstad Offshore.

A commitment to innovation and operational excellence has attracted an elite workforce, with the Company becoming a magnet for talent – drawing coveted skills and expertise from across the world. With solid experience working in the offshore industry, the management team at Frigstad Offshore boasts an impressive track record.

International drilling contractor providing the complete package

- As an international drilling contractor big enough to handle any job, but small enough to stay focused, Frigstad Offshore operates all types of offshore units. We provide a complete range of related services such as:

- Operational: Offshore rig operations with onshore operational support.
- Technical: Engineering, maintenance, technical support and supervision.
- Commercial: Contract negotiations with shipyards, suppliers and oil companies, marketing and business development.

- Administrative: QAHSE, procurement and logistics, hiring, manning and training of crew, development and implementation of management and maintenance systems and operational procedures.

Frigstad Offshore has thorough knowledge and experience in the setup and management of large-scale rig construction, upgrade and conversion projects including:

- Shipyards supervision teams.
- Provision of project engineering support.
- Supplier interface management.
- Administrative support including project planning, personnel management and cost control.
- Procurement of Owner Furnished Equipment, such as drilling equipment, BOP, marine risers and marine equipment etc for new building and conversion projects.
- Operational readiness planning, including developing and implementing maintenance and operational procedures.

Left: The jackup unit "Astra". Frigstad Offshore provided management from 1999 to 2001 including drilling school for Russian personnel.

Middle: Semi-submersible "Galaxy Driller". Managed by Frigstad Offshore in Philippines and Indonesia from 1995 to 1999.

Right: Jackup Marawah managed by Frigstad Offshore in Saudi Arabia and Bahrain from 1992 to 1998

Setting the benchmark within quality and safety

As an internationally recognised and trusted company, we are committed to procedures and business practices that safeguard our brand, our reputation and our clients.

With a skilled and motivated workforce we strive to exceed our clients' expectations, while maintaining the strictest standards of health, safety and quality at every step of the process.

As well as being accredited with the ISO 9001 international quality management standard, we place a great emphasis on being a good corporate citizen and protecting the environment, keeping a strong focus on transparency and business ethics. We maintain an internal control system for purchasing, accounting and payments, and we conduct internal and external audits of our activities on a regular basis.

Industry experts

Wherever the rig, whatever the job, at Frigstad Offshore we have the personnel with the competence and experience needed to perform and satisfy our clients' expectations.

As an industry employer of choice for professionals around the world, Frigstad Offshore is able to handpick the very best talent – to the benefit of our clients and partners.

Frigstad Offshore continues to strengthen the position of the Frigstad Group as a leading developer of modern deepwater drilling rig designs – thereby attracting increasing numbers of industry professionals to the group.

With an internationally renowned workforce, and a name for innovative and cost saving solutions, Frigstad Offshore is the tried, tested and trusted team – ready and capable of realising the full potential of your offshore drilling projects.

With Frigstad Offshore towards success

From 1989 until today, Frigstad Offshore has played an important role in the success of its partners worldwide. With activities in 15 different countries across the world, spanning a wide range of different projects, we have a truly international track-record.

In addition to management of numerous large scale upgrade – and conversion projects as well as international rig operations on behalf of third parties, Frigstad Offshore has also taken on special projects in its own capacity;

Left: Frigstad D90™, the world's most powerful ultra deepwater semi-submersible.

Right: Harald Frigstad, CEO of Frigstad Discoverer Invest Limited, is ringing the bell at Oslo Stock Exchange in April 2007.

In 2006, newly founded Frigstad Discoverer Invest Ltd (FDIL) – an affiliate of Frigstad Offshore – raised US \$240 million from investors to fund construction of the world's most powerful deepwater semi-submersible drilling rig – the SS Frigstad Oslo, of the Frigstad D90™ design, developed by Frigstad Engineering, also part of the Frigstad group of companies.

Listed on the Oslo Stock Exchange in April 2007, FDIL was acquired by the large Italian offshore services company, Saipem SpA, later that year, and the rig was renamed Scarabeo 9.

Frigstad Offshore continues to oversee all aspects of the Scarabeo 9's construction as project manager and provides a team of skilled personnel in three countries to ensure a successful completion of the project.

A company with a secure and exciting future, Frigstad Offshore:

- Is a dynamic, independent drilling contractor that operates in a cost efficient and client focused manner.
- Has more than 20 years worldwide operating experience.
- Has been involved in both new rig construction and conversions for decades, generating an ever increasing pool of knowledge and expertise.
- Has built a reputation as a trustworthy partner by fulfilling the expectations of reputable clients and partners, including major drilling contractors and oil companies.
- Is closely involved in Frigstad Engineering's rig design activities and has built a competent organisation by recruiting talent attracted to synergies between in-house operations, management and design development.
- Maintains world-class management systems for new build projects and drilling operations.
- Enjoys an extensive international network throughout the industry value chain; with oil companies, shipyards, subcontractors and equipment suppliers, financial institutions etc.

A unique combination of industrial capabilities
